

Hempel's Energy Policy

As one of the world's leading coatings suppliers Hempel is respected and expected to deliver the most advanced, high performing and trusted solutions. Therefore, we always strive to improve, never standing still. For Hempel, adding a layer of paint means adding a layer of quality.

Our aim at Hempel is to:

- Increase energy efficiency & continuously improve our energy consumption and management system. To develop and maintain an Energy Management system in order to meet the requirements of the ISO 50001 standard
- To communicate this policy to our employees, customers, and suppliers to encourage and support their involvement.
- To continuously monitor and adhere to legal and other local requirements regarding energy use, consumption, and efficiency
- To ensure the resources needed to achieve the objectives and targets

To achieve this, we are committed to:

- Ensure the availability of information and necessary resources to achieve objectives and energy targets.
- To satisfy applicable legal requirements and other requirements related to energy efficiency, energy use and energy consumption.
- Support the procurement of energy efficient products and services that impact energy performance.
- Support design activities that consider energy performance improvement.

Lars Petersson, Group President & CEO
